boomerang

DESIGN: ANDRÉ RICARD

“Ideas don’t coming out of you that weren’t already there” André Ricard

The BOOMERANG is a relax armchair with footrest. A chair that André Ricard designed and edited in a small series in 1952. Today Calma recovers this vintage design for its quality and comfort.

The “boomerang” element is what supports the seat and backrest, in addition to giving the chair its own personality. The backrest has an internal device that allows the inclination to be varied naturally to adapt it to the most comfortable and ergonomic postures required.

All its elements: both the “boomerang” piece, as well as the seat, backrest and legs, are made of natural-colored oak wood protected by a suitable transparent varnish. Seat and back are made up of a wooden frame covered with a manual braiding of recycled cellulose polymer rope in natural color. A lacquered stainless steel frame connects the wooden structure and the four legs. The footrest that adapts to the width of the seat, is a reduced replica of the armchair with the same technical specifications.

The BOOMERANG is a furniture for both indoors and outdoors.
